

DIGITAL EMPLOYMENT & ENTREPRENEURSHIP PLATFORM (DEEP)

Andhra Pradesh Startup Job & Internship Portal — UI/UX Architecture Blueprint

Executive Summary: This technical design specification documentation details the architecture, information structure, system flow matrices, and wireframe blueprints for the government-backed unified tech employment portal serving all 26 districts of Andhra Pradesh.

1. Information Architecture & Sitemap

The system utilizes a structured, high-accessibility navigation architecture tailored to support multi-tenant operational paths across modern responsive viewport environments.

Global Navigation Structure

```
[Public Visitor]
├── Home (Landing Page)
├── Explore Startups (Directory by District/Sector)
├── Find Jobs (Advanced Search & Filters)
├── Find Internships (Duration/Stipend/Remote Filters)
├── Success Stories (Impact Metrics & Testimonials)
└── Auth Gateway (Login / Registration Split by Role)
```

Comprehensive Hierarchical Sitemap

```
+-- Public Pages
|   +-- Home (Ecosystem Hub & Quick Discovery Engine)
|   +-- Job Search Results (Dynamic Faceted Filters)
|   +-- Internship Search Results (Stipend/Duration Toggles)
|   +-- Startup Directory (Categorized by District & Sector Location)
|   +-- About AP Startup Ecosystem (Incentives & Policies)
+-- Auth Flow
|   +-- Unified Login (Multi-Role Tabbed Interface Container)
|   +-- Multi-Step Registration (Student / Startup Entity / Corporate Base)
|   +-- OTP Verification / Secure Password Recovery
+-- Student Dashboard
|   +-- Overview / Analytics (Profile Completion Tracker, Funnel Matrix)
|   +-- Profile & Interactive Resume Builder Module
|   +-- Job/Internship Application Tracker
|   +-- Saved Opportunities & Custom Alert Matrix
+-- Startup/Employer Dashboard
|   +-- ATS Overview (Active Posts, Stage Distribution Funnel)
|   +-- Job/Internship Post Creator (Multi-step structural wizard)
|   +-- Applicant Pipeline Manager (Visual Kanban Stage Board Views)
|   +-- Company Profile Editor & Verification Status Credentials
+-- College Placement Dashboard
|   +-- Student Roster & Academic Tracking Index
|   +-- Placement/Internship Data Metric Reports (Exportable Formats)
|   +-- Startup Engagement & Campus Drive Coordinator
+-- Super Admin Command Center
```

- +-- Ecosystem KPI Overview (Real-time Dynamic Aggregation)
- +-- Verification Queue (Corporate Verification & Job Validation Engines)
- +-- User & Permission Management (Granular RBAC Security Layers)
- +-- CMS, Notification Broadcast Engine, & Comprehensive Audit Logs

2. System User Flow Diagrams

The following process flows establish the precise transactional pipelines handling user actions across the platform stack.

Flow 1: Student Registration to Job Application

```
[Landing Page] → Click "Register" → Select "Student Role" → Enter Basic Details & Mobile  
→ [OTP Verification] → [Onboarding Wizard] → Upload Resume (Parser extracts skills)  
→ Complete Missing Profile Fields (Target Minimum: 80%) → Redirect to [Student Dashboard]  
→ Click "Job Search" → Apply District/Tech Filters → Click "Apply Now" on Job Card  
→ Preview Application & Custom Cover Note → [Submit Application] → Added to Application Tracker
```

Flow 2: Startup Onboarding to Job Posting & Applicant Review

```
[Landing Page] → Click "Register" → Select "Startup/Employer" → Enter Corporate Email & PAN/CIN  
→ [OTP Verification] → Complete Company Profile (District, Sector, Team Size)  
→ System places account in [Pending Admin Verification State] (Banner: Limited Access)  
→ Click "Post a Job" → Complete Job Details Wizard (Salary, Location, Skills, Description)  
→ Click "Publish" → Job enters [Admin Review Queue] → (On Admin Approval) → Job Live  
→ System triggers real-time matching notifications to students → Applicants apply  
→ Startup views Pipeline → Drags applicant from "Applied" to "Shortlisted" → Triggers auto-email
```

Flow 3: Admin Approval & Content Moderation Workflow

```
[Admin Logs In] → Arrives at Central Command Center → Sidebar Alert: "Pending Actions"  
→ Clicks "Startup Verification Queue" → Opens Startup Document Viewer (Verifies CIN against MCA data)  
→ Click [Approve] / [Reject with Reason Code]  
→ (If Approved) → Startup receives automated WhatsApp/Email notification activation  
→ Admin navigates to "Job Moderation Queue" → Reviews flag filters (Salary minimums, valid descriptions)  
→ Bulk Approves Valid Openings → Metric counters refresh automatically across ecosystem
```

3. High-Impact Wireframe Specifications

Low and mid-fidelity layout blueprints map interface alignment parameters for public views and role-restricted system components.

3.1 Public Landing Page (Desktop Layout Blueprint)

5. Information & Component Annotations

- **Role-Based Access Control (RBAC):** Granular page authorization parameters are enforced using specialized security rules directly configured inside application router nodes. Unauthorized actions auto-trigger secure fallbacks.
- **Government-Tech Component Pattern:** Built using reliable, readable contrast parameters (Deep Blue elements paired with structured grid frameworks) keeping visually identifiable government identity structures intact.
- **Fluid Viewport Adjustments:** Grid systems auto-wrap into stacked logical card items under restricted screen environments, preserving feature usability on all portable client form factors.
