STATES' STARTUP RANKING FRAMEWORK

6th Edition

DPIIT #startupindia

August 2025

1. Vision

- Following the launch of the Startup India initiative by Hon'ble Prime Minister Shri Narendra Modi to catalyze the growth of India's startup ecosystem, the first States' Startup Conference was convened in July 2016. The aim was to encourage States and Union Territories to foster their local startup ecosystems through targeted policy interventions, institutional frameworks, effective monitoring and recognition mechanisms.
- Since then, this periodic capacity-building and ranking exercise has become a cornerstone for energising the startup economy across the nation. It plays a crucial role in aligning key stakeholders, encouraging innovation-driven development and fostering healthy competition among States and UTs — collectively propelling India towards greater self-reliance and sustainable economic growth.
- The Ranking Exercise is employing a systematic approach towards recognizing States and Union Territories with mature and nascent Startup Ecosystems.
- The exercise will provide impetus to all enablers within States and Union Territories to maintain a conducive environment for the startup ecosystem.
- The objective is to establish an institutional framework that fosters collaboration between the Government, Private Sector, and Academia to collectively strengthen and scale the startup ecosystem across the country.

2. General Principles

- The framework would evaluate progress made from 1st January 2025 to 31st May 2026 (The period of consideration for the 5th edition framework was from January 2023 to December 2024). Consequently, submission of documentary evidence by states and union territories through the States' Startup Ranking Portal will need to be submitted by 10th May 2026.
- For the purposes of evaluation, all States and UTs have been divided into two categories: Category A and Category B. Category A has been further divided into two sub-categories, namely A1 and A2.
- The scores of various aspects in the framework may be divided into the following categories:
 - a) Document Submission
 - b) Private Ecosystem Assessment
 - c) Feedback Survey Scoring
