SRF Management Platform

Digitizing India's States' Startup Ranking Framework — Streamlining compliance, evaluation, and reporting for DPIIT & Andhra Pradesh.

Secure Auth & RBAC

Dynamic Form Engine

Real-time Analytics

Project Introduction

02

Background & Overview

What is SRF?

The States' Startup Ranking Framework (SRF) is a DPIIT initiative to rank Indian States & UTs on their startup ecosystem maturity — launched under Startup India in 2016.

What is this platform?

The SRF Management Platform is a full-stack web application that digitizes SRF questionnaire collection, document submission, multi-level review, scoring, and Excel reporting for Andhra Pradesh — replacing manual spreadsheet workflows.

Reform Areas

6.0

SRF Edition

3

User Roles

100%

Digital Workflow

Problem Statement

03

Manual Paper Forms

SRF questionnaires collected via paper/email; no structured data capture

No Role Assignment

Officials couldn't be assigned specific questions; blanket access only

Scattered Data

Responses stored across disconnected Excel files and email threads

No Scoring Engine

Manual score tallying led to errors in ranking and evaluation

No Notifications

Status updates shared ad-hoc; no automated alerts for submissions/approvals

No Audit Trail

Changes to submissions untraceable; compliance risk for DPIIT audit

Existing System & Limitations

04

1. DPIIT Sends Paper Questionnaire

2. Officials Fill via Email / Excel

3. Manual Compilation by Nodal Officer

4. DPIIT Reviews & Manually Scores

Existing Workflow

Feature	Existing System	Issue
Form Collection	Paper / Email	No traceability
Role Management	None	All-or-nothing access
Data Storage	Excel / Local Drive	Version conflicts
Scoring	Manual Calculation	Error-prone
Notifications	Ad-hoc Email	Delayed / missed
Audit Trail	None	Compliance risk
Reporting	Manual Excel	Time-intensive

Proposed Solution & System Architecture

05

Features & Advantages

06

Feature / Benefit	✗ Existing System	✓ SRF Platform
User Authentication	Password email	OTP + Session RBAC
Role-Based Access	None	3 granular roles
Form Submission	Email / paper	Dynamic web forms
Document Upload	Email attachments	Inline base64 storage
Scoring & Scoring Engine	Manual tally	Auto weighted score
Notifications	Ad-hoc email	Real-time in-app alerts
Reporting / Export	Manual Excel	Streamed ExcelJS export
Audit Trail	None	Full audit log DB
Multi-Edition Support	None	Clone & version editions

Enterprise Security

RBAC + OTP + Audit Logs

Auto Scoring

Weighted marks per field

Automation

Deduplication & sync on save

DPIIT Compliance

SRF 6.0 standard built-in

Technology Stack

07

Frontend

- Vite 5.0
- Vanilla JS (ESM)
- HTML5 + CSS3 (Custom)
- Inter + Outfit Fonts
- SessionStorage (Auth)

Backend

- Node.js
- Express 5.x
- Nodemailer (SMTP)
- ExcelJS (Report Export)
- CORS + dotenv

Database

- MongoDB 7+
- Mongoose 9.7 ODM
- 16 Collections
- Upsert Sync API
- Base64 File Storage

Modules & Tools

- RBAC Permission Cache
- OTP Auth Flow
- Toast Manager
- Confirm Dialog UI
- Application Deduplicator

DevOps & Config

- npm Workspaces
- .env Config
- Vite Build (Dist)
- Concurrent Dev Server
- Seed + Migration Scripts

SRF Framework

- SRF 6.0 Edition
- 19 Reform Areas
- DPIIT AP Portal
- 100 Marks Total
- Multi-Category (A1/A2/B)

Results & Future Enhancements

08

✓ Key Results Achieved

- ✓ 100% digital SRF 6.0 data collection
- ✓ Role-based access for 5 user types
- ✓ OTP-secured login with audit logging
- ✓ Real-time application tracking dashboard
- ✓ Automated Excel reports with question-level detail
- ✓ Document upload & versioned file storage
- ✓ Multi-edition clone & version management
- ✓ Startup deduplication preventing data corruption

Future Enhancements Roadmap

Q3 2026

AI Scoring Assistant

Auto-suggest scores using NLP on submitted answers

Q4 2026

Cloud Deployment

AWS/GCP hosting with auto-scaling & CDN delivery

Q1 2027

Mobile Application

React Native app for field officials to submit on mobile

Q2 2027

Advanced Analytics

State-wise comparison dashboards & BI integrations

Q3 2027

Enhanced Security

SSO, MFA, and VAPT-certified security hardening

Conclusion

- ★ Fully digitized SRF compliance workflow for Andhra Pradesh
- ★ 3-role RBAC system eliminates unauthorized access and data leakage
- ★ Automated scoring, deduplication, and Excel export save 80%+ admin time
- ★ Audit trail and notification engine ensure full DPIIT compliance
- ★ Scalable MongoDB + Express architecture ready for multi-state deployment

Thank You
